

CareChek

*advanced screening technology to help
reduce disease risk in the workplace*

*september 2020
strictly private and confidential*

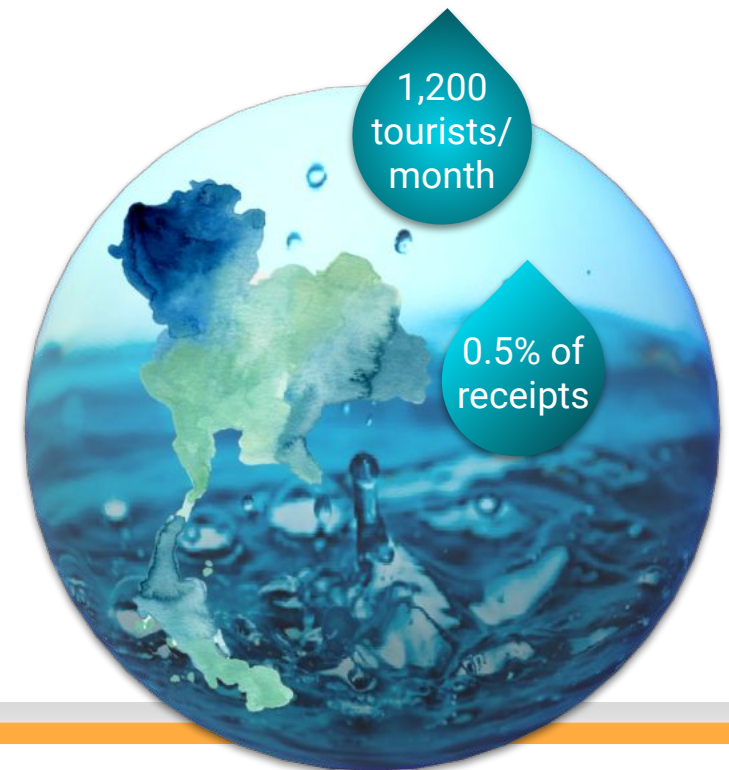

Thailand tourism collapse

currently approved plan:

- 9 month visas for long stayers:
- must stay at least 90 days
- mandatory 14 day quarantine
- proof of advance payment

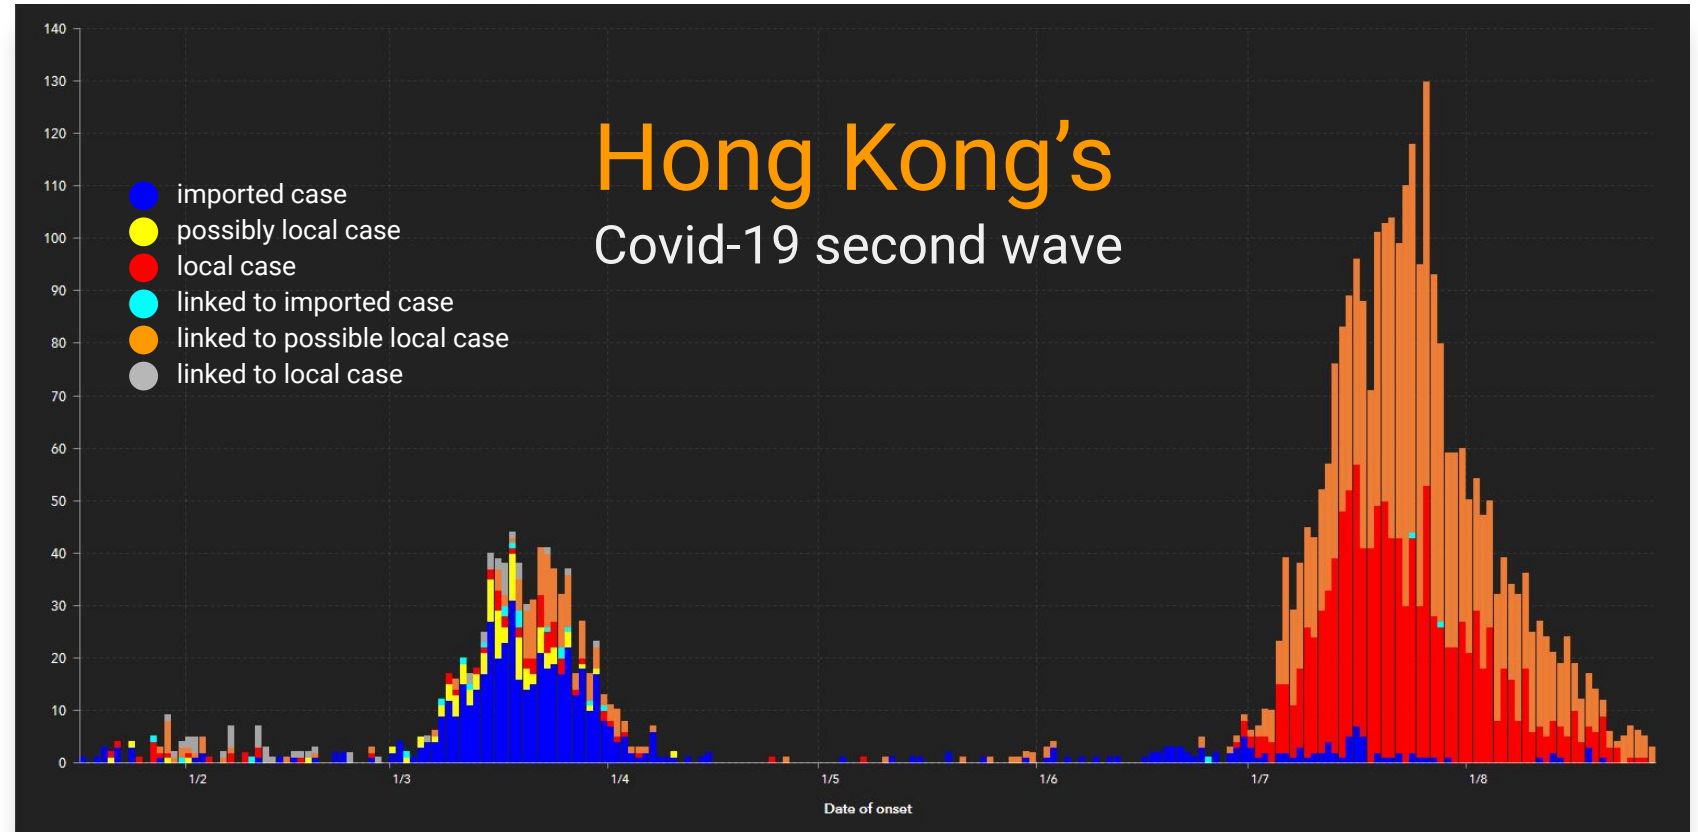

the US Centers for Disease
Control estimates

50%

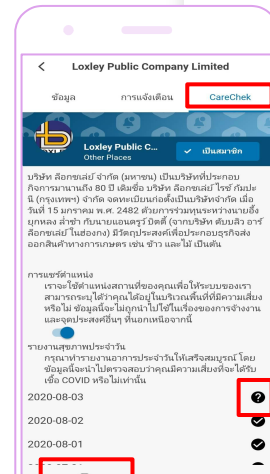

of
Covid-19
infections
occur

while the infected person
shows no symptoms

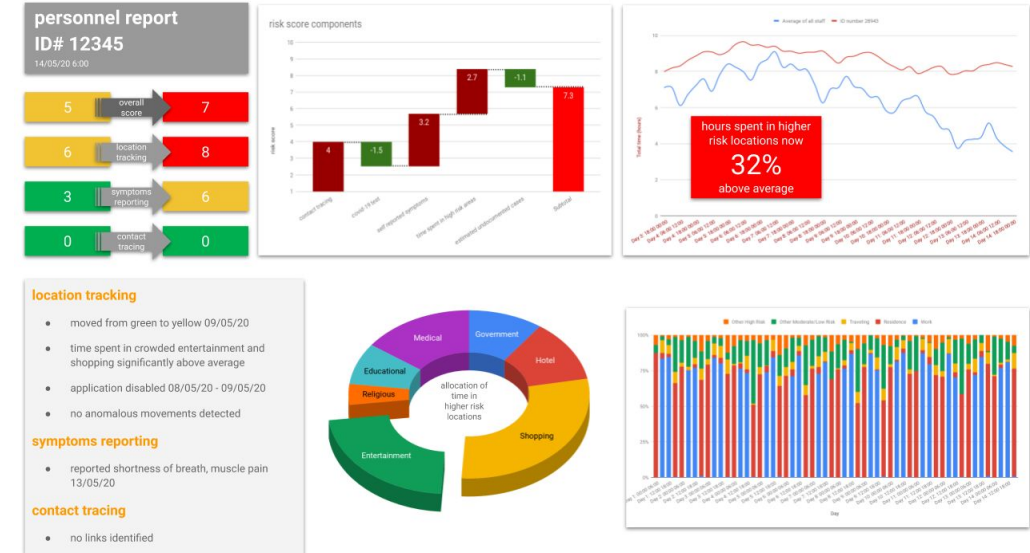

CareChek continuous risk assessment and monitoring

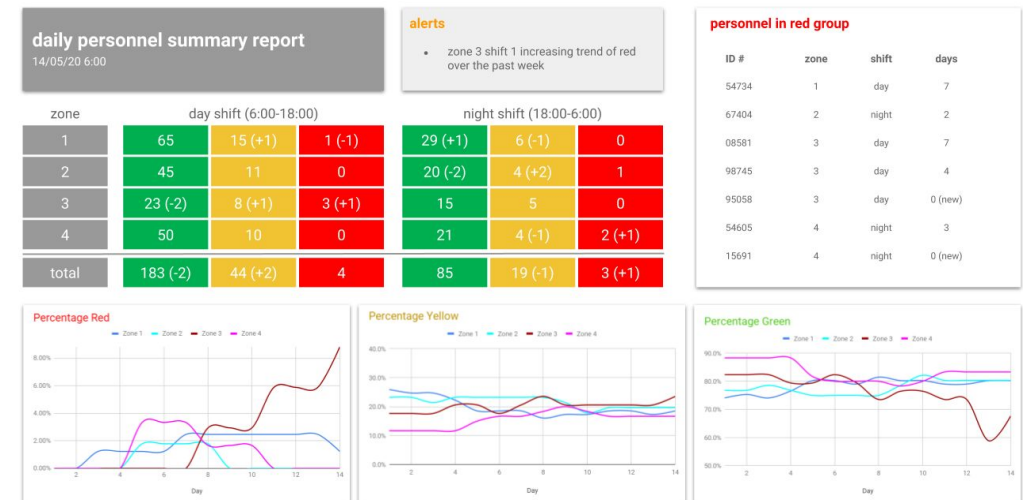

- near **real time** risk scoring and classification
- risk calculations evaluated on an **individual basis**
- user data is transmitted and **processed anonymously**
- sophisticated algorithm accounts for **non-symptomatic transmission risk**

user level analytics

administrator BI dashboard view

CareChek market opportunity

facilitate normalised tourism

- **CareChek** version specifically for visitors
- shorter (5-day) quarantine period
- 2 Covid-19 tests: upon arrival and on day 5
- visitors can exit quarantine if both tests are negative and **CareChek** app remains on
- partnerships with travel industry

visitor compliance badge to gain access to public transport, accommodation, shops, and tourist attractions

current deployments
